

**LIME PHOSPHATE**

IS A NORTH CAROLINA

**Home-Made Fertilizer.**

The rock is mined near Wilmington and ground at Raleigh. It contains over sixty per cent of Carbonate of Lime (Agricultural Lime) badly needed on every farm, and ten to twelve per cent. of Phosphate of Lime (Phosphoric Acid) and a small per cent of Potash—both standard articles. Analysis by the State Chemist: It is the richest marl in the world. Sold for less than half the price of fertilizers made with Sulphuric Acid.

YOU CAN MAKE ALL YOUR MANURES AT HOME OUT OF

**LIME PHOSPHATE.**

FOR CORN:

1. A compost of Lime Phosphate, 1,000 pounds, Kainit or hard wood ashes, 200 pounds, and 800 pounds of cow or horse stable manure, makes as good a general manure as can be found.  
2. On land rich in vegetable matter, like bottom or new land, use 500 pounds of Phosphate.

**FOR CLOVER AND GRASSES**

Lime Phosphate is the best clover food known. It gives good stands corrects the sourness of red lands of the middle and western counties. It will make clover grow on red hillside galls, which we consider the greatest triumph. Use 600 to 2,000 pounds per acre on clover and grasses. On very sandy land use Kainit with it.

**FOR PEASE,**

It is the natural manure, as might be supposed; 600 pounds per acre, with kainit, on sandy land.  
Excellent top dressing for small grain, clover and the grasses.

**FOR TOBACCO:**

600 pounds Lime Phosphate, 1,000 pounds finely-chopped stable manure, 200 pounds leached ashes, 200 pounds high grade ammoniated fertilizer.
